

Actuators

HP actuators are Linear, Hydraulic and Pneumatic Single and Double Acting type, Wire Cutting and Non Wire Cutting type, Diaphragm type

ACTUATORS:

Valve size up to 16" - Pressure rating up to 15.000 PSI.

"OFS/PN"
PNEUMATIC ACTUATOR

"OFS/HY"
HYDRAULIC ACTUATOR

"OFS/SD"
DIAPHRAGM ACTUATOR

SSV - SDV - BDV Actuated gate valves with "OFS" series Compact Quick Disconnected Actuator

Pneumatic Actuators
4. 1/16" 6650 PSI
Wire cutting and not wire cutting

Quick Disconnect HY/PN Actuators

HP actuators are characterized by many features to allow the easy dismount of the actuator from the valve :

- quick opening of the actuator and splitting in the components for easier maintenance
- actuators are designed to be fail-safe and fail-close
- hydraulic actuator is recommended for use in high pressure and/or large-bore applications
- pneumatic actuator is used for low/medium pressure and/or small bore applications.
